

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1-22. (canceled)

23. (currently amended) Urological measuring instrument for measuring urine flow, said instrument comprising a number of consecutive components comprising at least a receiving member (5) for the urine flow and a flow indicator means (7) for assessing at least a magnitude of the urine flow, in which, at least in a ready-to-use state, the receiving member is in open liquid communication with a urine guide (6) and an inlet of the ~~indicator means, characterized in that~~ wherein the instrument is embodied as a disposable article which is formed substantially from flexible material, in that the instrument is in a folded position in a storage state, said components of the instrument lying at least substantially folded onto each other with respective external surfaces facing each other and being substantially flush with each other, in that the instrument is in a straightened position in the ready-to-use state, said components of the instrument lying at least substantially in line with each other, in that the receiving member has a relatively compact storage state and an expanded ready-to-use state, in that

the receiving member is designed and adapted to be brought manually from its storage state to its ready-to-use state, and in that the receiving member is open on at least one side and comprises a cavity for receiving the urine flow therein, at least in its ready-to-use state.

24. (currently amended) The urological measuring instrument as claimed in claim 23, ~~characterized in that~~further comprising a collecting device, in which at least during use, is in open communication with the urine guide on an end opposite the receiving member, in that the collecting device is provided with a closing member (9) having a normally-closed position and in that the collecting device is expandable from a relatively compact storage state to an expanded position of use.

25. (currently amended) The urological measuring instrument as claimed in claim 24, ~~characterized in that~~wherein the collecting device is connected to an outlet of the flow indicator~~-means~~.

26. (currently amended) The urological measuring instrument as claimed in claim 24, ~~characterized in that~~wherein the collecting device comprises a collecting bag.

27. (currently amended) The urological measuring instrument as claimed in claim 24, ~~characterized in that~~wherein the collecting device is provided with volume indicator ~~means~~ (10) for a urine volume received therein.

28. (currently amended) The urological measuring instrument as claimed in claim 24, ~~characterized in that~~wherein in the storage state at least one of the receiving member (5) and the collecting device (8) covers the urine guide (6) on one side of the flow indicator ~~means~~-(7).

29. (currently amended) The urological measuring instrument as claimed in claim 23, ~~characterized in that~~wherein the flexible material comprises at least two foil sheets hermetically attached to each other on a mutual contact surface while at least partially forming one or more of said consecutive components of the instrument.

30. (currently amended) The urological measuring instrument as claimed in claim 29, ~~characterized in that~~wherein the components include the receiving member, the urine guide, the flow indicator ~~means~~ and a collecting device.

31. (cancelled)

32. (currently amended) The urological measuring instrument as claimed in claim 23, ~~characterized in that~~further comprising an irreparable breakable seal (2) is provided, holding adapted to hold the instrument in the storage state and allowing the instrument to be brought into the ready-to-use state only after being broken.

33. (currently amended) The urological measuring instrument as claimed in claim 23, ~~characterized in that~~further comprising a registration means are member arranged on an outer side thereof of said instrument for manual registration of one or more indicator values determined with the instrument.

34. (currently amended) The urological measuring instrument as claimed in claim 33, ~~characterized in that~~wherein the registration means comprises member comprises a removable self-adhesive label.

35. (currently amended) The urological measuring instrument as claimed in claim 34, ~~characterized in that~~wherein the label is arranged at the position of the flow indicator means, leaving a transparent window at the position of a display area of said flow indicator means.

36-38. (cancelled)

39. (currently amended) The urological measuring instrument as claimed in claim 23, ~~characterized in that~~further comprising a time duration indicator ~~means are provided for~~ determining a time duration of the urine flow.

40. (currently amended) The urological measuring instrument as claimed in claim 39, ~~characterized in that~~wherein the time duration indicator ~~means comprise~~comprises a reservoir which, at least during use, is in open communication via a defined passage opening with the urine flow and that said reservoir is provided with a volume indicator ~~means~~-(10) for a urine volume received therein.

41. (currently amended) The urological measuring instrument as claimed in claim 40, ~~characterized in that~~wherein the passage opening is situated at least close to an inlet of the flow indicator ~~means~~.

42. (cancelled)
